## EXPERIENCE

### GLOBALLOGIC INC. | SOFTWARE ENGINEER

May 2022 – Present | Gurugram, India

- Worked as part of a cross-functional development team to design, develop, and maintain scalable web applications and enterprise solutions for clients across industries, ensuring high performance and reliability.
- Played a key role in delivering a major eCommerce web platform with enhanced product data accuracy and improved user experience.

### GLOBALLOGIC INC. | ASSOCIATE SOFTWARE ENGINEER

May 2022 – May 2023 | Gurugram, India

- GlobalLogic, a Hitachi Group Company, is a leading digital engineering services company that focuses on helping organizations transform their business by providing innovative solutions in the industries.
- Worked as an Associate Software Engineer at GlobalLogic, contributing to the "DQ GOVO" project, a Google initiative, as part of a skilled team.

## PROJECTS

### PRODUCT SHOPPING DATA QUALITY (P.S.D.Q)

( USING HTML, CSS, REACT, MYSQL , NODE.JS)

- The Product Shopping Data Quality (P.S.D.Q) platform using React.js to ensure accurate, consistent, and high-quality product data for eCommerce websites. The project focused on data validation, cleaning, and quality reporting to improve product listings and enhance customer shopping experiences.
- Implemented real-time data validation checks (e.g., for missing product details like images, descriptions, or pricing inconsistencies) using React.js and Redux for efficient state management.
- Used React Router for efficient navigation and routing between different data quality views and reports, enhancing the user experience and accessibility.
- Used REST APIs to fetch and submit product data to external databases and third-party eCommerce platforms for cross-platform validation.

### AN ECOMMERCE APP USING REACT FRAMEWORK.

( USING HTML, CSS, JAVASCRIPT, REACT, MYSQL )

- Developed a fully-functional eCommerce platform leveraging React.js for the frontend to provide users with an intuitive, seamless shopping experience.
- Built a responsive, component-based architecture using React.js, adhering to React Functional Components and Hooks (e.g., useState, useEffect) for better code maintainability and reusability.
- Used Redux Thunk middleware for handling asynchronous actions like fetching product data, processing user orders, and interacting with external APIs.

## SKILLS

### PROGRAMMING LANGUAGE

- HTML
- CSS
- Javascript

### LIBRARIES/Frameworks

- React.js
- Node.js

### DATABASE

- MongoDB
- MySQL

### TOOLS & VERSION CONTROL

- Visual Studio
- Git

### OPERATING SYSTEMS

- Windows
- Linux

## EDUCATION

### GLOBAL INSTITUTE OF TECHNOLOGY AND MANAGEMENT | GURUGRAM, HARYANA

B.TECH IN COMPUTER SCIENCE AND ENGINEERING

2016 - 2020
